Education

University of Salford - BSc, Computer Science with Professional Experience (Sep 2024 – Present)

First year: First Class (80.17%)

- **CS: Programming Languages (Java, Python, PHP, JavaScript)**, Data Structures and Algorithms (**Java**), AI and Data Mining (**Python**), Client Server System (**PHP, JavaScript, SQLite**), Computer System Internals and Linux, Programming 1 & 2 (**Java**), Database System (**SQL**), Design Patterns (**Java, JavaFX**), HCI and Web Development (**C#, .NET, HTML, CSS, Bootstrap, JavaScript**).

Projects

Find A Placement: poseidon.salford.ac.uk/HackCamp/ – Group Project

Dec 2025 - Present (**PHP, JavaScript, Bootstrap, SQLite, Git, Unit Testing, Agile/Scrum, SDLC, MVC**)

Client – BCS Manchester

- Acting as Scrum master and developing a full-stack software solution as part of a team of seven for BCS Manchester that helps students find a placement.
- Implemented software development life cycle (SDLC) procedures and collected user requirements while directing team organisation and Agile methodologies using Jira.
- Created secure login systems tailored for different user types, including students, employers, career staff, and administrators.
- Developed the administrative and career staff dashboards and integrated databases for each user.
- Designed the full website UI on Figma and built the front end for the home page, article page, admin, and career dashboard.
- Introduced Git branching strategies for source code management and team collaboration.

Spring Boot Data Analysis API: github.com/abdursujon/spring-data-analysis-api – Personal

Aug 2025 - Present (**Java, Spring Boot, Lombok, H2, JUnit, Google Cloud Platform, CI/CD, Docker, Git, Linux**)

- Built a data analysis API to allow data engineers to ingest CSV, JSON, TXT, and Excel files for data analysis to explore unknown datasets, data quality assessment, ETL pipeline validation, data profiling, and self-service analysis.
- Created API endpoints allowing users to download analysis for future data comparison.
- Deployed the application on Google Cloud Platform with automated CI/CD workflow via Git-based pipelines.
- Implemented automated JUnit tests integrated into the Git CI pipeline to run on every commit before deployment.
- Integrated H2 in-memory database for testing, fast data processing, and immediate result retrieval.

Transform My Raw Data: abdursujon.github.io/transform-my-raw-data – Personal

Sep 2025 - Present (**TypeScript, React, Vite, Node.js, Tailwind**)

- Developed a user-friendly front-end UI for the spring data analysis API, enabling users to upload files for data processing.
- Optimised processing by preventing redundant computations, such as generating new analyses for the same file content.
- Integrated background API communication to call specific endpoints to retrieve, delete, and download analysis.
- Implemented downloadable UI functionality where the user can one-click and download the file.

Technical Skills

- **Programming Languages:** Java, Python, TypeScript
- **Database:** PostgreSQL, SQLite, H2
- **Frameworks & Tools:** React, Node.js, Spring Boot, Lombok, .NET, Bootstrap, Tailwind, Figma
- **DevOps:** Git, Linux, CI/CD, Docker, Google Cloud Platform, JUnit

Experience

Team member – Tortilla (Mar 2024 – Dec 2025)

Manchester, UK

- Recognised for punctuality and reliability, including assisting colleagues by covering their shifts in urgent circumstances.
- Awarded a skill competency assessment and progress review certificate from the company.
- Provided customer service in a busy restaurant, serving 500+ per day.

Team Leader – Subway (Sept 2022 – Feb 2024)

Chelmsford, UK

- Organised and maintained a clean working environment as a team, improving overall workplace satisfaction for colleagues.
- Collaborated with management to handle inventory and place supply orders, reducing workload for management.
- Led and supervised a team of 10, achieving outstanding customer service standards.
- Trained and mentored new employees, enabling quick learning and engagement.

Leadership & Interests

University of Salford Hack Camp – Scrum Master and Software Developer.

Cricket, Chess, Science Fiction, Film
