Profile

Computer science student who is specialising in software and web development. Combining both academic and independent learning, developed full-stack websites with excellent user interfaces. Currently leading a team of five peers to deliver a software application for a real client in the Salford Hack Camp group project. Led a team of ten members at previous employment, and currently working as a team member at Tortilla. Combining transferable skills from work experience with a passion for technical problem-solving, I am well equipped to contribute to a professional team in developing innovative technological solutions.

Education

University of Salford Manchester

BSc (Hons) Computer Science (2024 – 2028)

Expected Grade: First

Year 1 – Average: 80.17%

- **Web Development & HCI (84%)** – Published a responsive front-end project utilizing Bootstrap, JavaScript, CSS, and HTML. Researched human-computer interaction principles and developed a clone GP application utilizing .NET/C#.
- **Computer System Internal & Linux (88%)** – Enhanced knowledge in computer system fundamentals, with hands-on experience in Linux and virtualization tools.
- **Professional Development & Practices (68%)** – Explored ethics and professional development standards in computing.
- **Database System (90%)** – Acquired a deep understanding of SQL and its integration in system development.
- **Programming 1 (74%)** – Gained proficiency in OOP, Java syntax, and data structures, and debugging.
- **Programming 2 (77%)** – Deployed a console-based vehicle hire system demonstrating advanced understanding of Java.

Year 2 – (Current)

- **Software Project with Agile Techniques:** Leading a group of five members to create a software solution utilizing the SCRUM method according to requirements from a real client.
- **Data Structures and Algorithms:** Gaining a strong grasp of data structures and how data plays a key role in algorithm optimization.
- **Client Server System** – Developing a full-stack web application using PHP, MySQL, and JavaScript.
- **Design Pattern** – Applying object-oriented design principles with Java and JavaFX to build desktop software solutions.
- **Network and Security:** Learning how to develop secure software by implementing network and security principles.

Technical Skills

- **Programming:** Java, PHP, JavaScript, C# (Familiar)
- **Front-end:** HTML5, CSS, SASS, Bootstrap, JavaScript, Web Design, UI/UX, Logo Design, Figma, Inkscape, Typography, JavaFX, .NET
- **Back-end & Tools:** PHP, SQL, MySQL, PHPMailer, REST APIs, PHTML, Linux, Git, Github

Projects

Emilia's Della Roma

- A demo website for a restaurant where users can search for a nearby Emilia's location.
- Implemented a mobile-first approach, as most users will access the website on mobile devices.
- Users can reserve a table, subscribe to a newsletter, and submit an enquiry form.
- Customers receive a confirmation of the booking details via email.
- This project utilized HTML5, CSS, JavaScript, Bootstrap, PHP, PHPMailer, and postcode.io.

North Trafford GP Clone

- Conducted research on Human-Computer Interaction to make the system accessible for everyone.
- Users can check in and search for a specific department location by entering the department name.
- Created a bilingual system to allow Welsh speakers to switch the language settings to Welsh.
- Developed using C# and .NET along with HCI principles.

Vehicle Hire System

- This system can read a data file to collect details regarding customers and vehicles.
- The system provides functionality to add new customers or vehicles to the text file.
- Vehicles have subcategories, allowing users to rent different types of vehicles, such as cars, vans, and trucks.
- The vehicle reservation class is utilized to check for any current reservations on a specific date that may conflict with new requests.

Portfolio Website

- Created a personal portfolio showcasing skills, projects, and contact pages.
- Implemented dynamic greeting functionality that changes based on the time of day.
- Enabled visitors to explore additional projects through a dedicated project page hosted on domain sujons.com.

Work Experience

Team Member, Tortilla Manchester

50 Oxford St, Manchester, M1 5EJ

Manchester, UK

Mar. 2024 - Present

- Maintain excellent customer service under busy and stressful situations and recognized as Employee of the Month.
- Recognised for punctuality, assisting colleagues by covering their shifts, and arriving early to handle urgency.
- Awarded skills competency assessment and progress reviews certificate from the company.
- Keep workspace clean and organised to optimise workflow, frequently praised for it.

Team Leader, Subway

11 Bishop Hall Ln, Chelmsford, CM1 1SH

Chelmsford, UK

Sept. 2022 - Feb. 2024

- Trained and mentored new employees, resulting in quick learning and engagement.
- Mediated disputes among team members to maintain a positive work environment.
- Led and supervised a team of ten individuals to ensure outstanding customer service.
- Collaborated with management to handle inventory and place supply orders.
- Earned University of Subway, Food Safety, and Sandwich Artist certificates.
- Processed end-of-day cash reconciliation and accurate stock counts.
- Ensured weekly store cleaning, by collaborating with the team.
